

# Model AMT

**Dewpoint Transmitter 4-20mA. Ranges available between -120°C to +20°C (-184°F to +68°F) dewpoint**

**Model AMT Dewpoint Transmitter** is a two wire 4-20mA loop powered transmitter, used for continuous measurement of moisture in dry process gases or dry compressed air, which will output a linear 4-20mA signal corresponding to the dewpoint temperature. The Model AMT transmitter can also be factory configured to output a 4-20mA linear signal for any other moisture unit e.g. ppm(v), ppm(w), g/m<sup>3</sup>, lb/MMSCF etc.

**Fast Response - Stable - Reliable - Accurate - Easy to Install.**

The Ultra High Capacitance sensing element is long lasting and offers excellent sensitivity, repeatability and response speed. Each unit is supplied with a Certificate of Calibration, traceable to International Humidity Standards, validating accuracy better than ±2°C dewpoint.

**CE**  
 Measuring instrument conforms with BS EN 61326-1

## FEATURES

- 2 Wire Loop Powered Dewpoint Transmitter
- Overall Range: -120°C to +20°C Dewpoint
- Accuracy better than ± 2°C Dewpoint
- INTEGRATED AUTOMATIC CALIBRATION
- Can be configured for linear 4-20mA signal in: °C & °F Dewpoint, ppm(v), ppb(v), g/m<sup>3</sup>, lb/MMSCF
- Temperature Compensation
- Failure Diagnostics
- Long Term Stability
- Fast Response Time
- IP66 / NEMA4X Protection

The transmitter also incorporates an Automatic Calibration (AUTOCAL) feature, which allows the user to carry out a field calibration / span check. The **AUTOCAL feature** is operated by two small button switches built within the transmitter enclosure. To avoid tamper, the switches are locked in normal use and can only be activated by following a specific routine from the manual.

The integral RISC microprocessor circuitry of the **Model AMT** transmitter allows high resolution with advanced self diagnostics for fault conditions. It also enables periodic re-calibration of the moisture sensor, storing calibration data within the fully self contained unit. Loop powered by a 7V to 28V dc source, the **Model AMT** transmitter will provide a linear 4-20mA signal over the chosen range.

The mechanics of the **Model AMT** transmitter have been designed to cope with extreme environmental conditions. The rugged stainless steel construction offers protection to IP66 (NEMA4X), with the transmitter electrical connections made via a secure industrial connector.

**Model AMT** transmitter can withstand 35,000 kPa (350bar) maximum pressure and by employing a low resistance cable, the transmitter can be located at significant distances, in excess of 1000 metres, from the control room.

Designed with the operator in mind for reliable and accurate measurements, the **Model AMT** transmitter is extremely easy to install and operate, requiring little or no maintenance.

The **Model AMT** transmitter is supplied with a Certificate of Calibration, an instruction manual and 2m connecting cable.

**Note:** The **Model AMT** is not suitable for Ammonia (NH<sub>3</sub>), Chlorine (Cl) and Hydrogen Chloride (HCl). SF<sub>6</sub> can be monitored with no effect to the sensor element. Sulphur Dioxide (SO<sub>2</sub>) can be monitored if the moisture content is low, less than 100ppm(v).
